## Spring Meeting

A report of the Spring 2009 meeting is now available online. Click [here](#) to view.

## DUG Software

Our 'posting spreadsheet' is now ready for download by members. You must be a licensed Dream user to use this, and your PC must have the 'External DLL' installed. Full instructions (for administrators) are supplied with the spreadsheet. You may want to develop your own end-user instructions. Click [here](#) to download from the members' website (login required).

The budget maintenance program demonstrated at last month's meeting will be available later this month. Please watch out for another communication from us about this.

## Members website

Following a suggestion at the recent meeting, the members website has a new section: a **3.3 Upgrade** 'list', where you can post comments about your experience of the Dream 3.3 upgrade (either the upgrade process or Dream 3.3 itself).

## Server move

Please note that the Dream User Group websites will be out of action for a day on June 17th as we are moving our servers to a new data centre on that day.

## Next Meeting

Our next meeting will be another two-day meeting, almost certainly in November 2009, and somewhere central but north of London.

One day will be devoted to user and vendor presentations, whilst the other will be devoted to special interest groups and discussion sessions. Hands-on sessions will be provided if possible.

More details will be sent out in September.

## Object

The objective of the DREAM User Group is to provide services to Member organisations using the DREAM accounting system produced by CODA plc. The User Group will provide information and hold meetings, and will make collective representations to CODA and others for the general benefit of the Members.

## Subscription

This message was sent to you because your organisation (which is a member of the DREAM User Group) has previously nominated you as an individual member, or because you attended our spring meeting. To unsubscribe, please click [here](#).

## Mail Format

If you would prefer your messages in plain text, please let us know by clicking [here](#).
